Sparekassen Sjælland-Fyn

Going from strength to strength

After sucessfully completing the 'New Ways' strategy, the new 'Towards New Goals' strategy adds excitement to the investment case. If management delivers, we see 25-52% upside potential to our mid-term estimates, and possibly a solid share price catalyst. Strong operational momentum on both income and costs remains key. We see a fair value range of DKK183-215/share (from DKK173-203), 9-28% above current levels.

- Solid start to 2022. Q1 22 showed solid NII and fee income momentum, while bank lending remained muted but should show growth going forward. Negative market value adjustments adversely affected Q1, while costs rose 7% y/y. The cost increase, however, was caused mainly by investments on the back of the new strategy. As the bank's home market continues to benefit from high economic activity, we expect bank lending to recover in the coming quarters, while off-balance sheet activity and revenues continue to improve. Impressive growth figures in Totalkredit/DLR, Asset management and insurance sales are driving high-quality fee income substantially higher. In total, Sparekassen Sjælland-Fyn more than doubled pre-provision profits in 2021 versus 2018, an achievement no other Danish bank was able to deliver, and we expect operational improvements to continue. In addition, credit quality remained exceptionally strong with 61% of total exposures within the FSA's best category '3/2a'.
- New strategy offers a potential new catalyst. The new strategy for 2025-26, 'Towards New Goals', is timely, prudent and shows confidence, in our view. The business model is now stronger than ever thanks to successful completion of 'New Ways'. The >10% ROE ambition and cost/income ratio below 50% imply 25-52% upside to our 2025-26 estimates.
- Solid growth and capital distribution targets. Sparekassen Sjælland-Fyn targets 4-8% annual growth in total business volumes. This leaves room for a flat DKK6 DPS ahead, with scope for topping up via buybacks.
- Valuation. SPKSJF trades at an adj P/E (22E) of 8.8x. We estimate a fair value range of DKK183-215/share (previously DKK173-203), 9-28% above the current share price.

Investment case

In our view, Sparekassen Sjælland-Fyn ticks all the right boxes of a potentially attractive investment, diverging from the general earnings pressure that the sector is facing.

The bank has a clear niche strategy from its physical presence, with strong 11% customer inflow in recent years and a better track record than peers in converting customer inflow into both business volumes and AUM growth. Its home market is less competitive than that of some Nordic peers and it benefits from Totalkredit's lower mortgage prices. A Bankdata setup makes it appear a potential takeover target, but with clear financial targets, management is keen to deliver standalone.

Valuation and methodology for deriving valuation range

Our capital- and risk-adjusted Gordon Growth model returns a fair value range of DKK183-215/share (previously DKK173-203). This is 9-28% above the current share price. In the range, we apply a cost of capital range of 9.5-10.5% and 60-80bp of normalised loan losses (previously 8.5-10.5% cost of capital and 50-70bp of normalised loan loss provisions).

Risks

Macroeconomic exposures

Like its peers, Sparekassen Sjælland-Fyn is exposed to macroeconomic developments, including economic activity and interest rate levels.

NII pressure from competition

Margin pressure and/or lower credit growth due to intensified competition, lower interest rate levels and lower general credit demand would be key risks, in our view.

A market switch to digital distribution channels

Sparekassen Sjælland-Fyn has one of the largest physical distribution networks in Denmark relative to its total size. While we see it as a key asset today, changed customer behaviour and/or the emergence of new technology could leave Sparekassen Sjælland-Fyn with a costly and obsolete platform.

Higher costs

Management has a clear ambition of lowering costs in the coming years, while at the same time increasing business volumes and income. The bank has been able to lower full-time employees (FTEs) and hence costs in recent quarters, but general wage inflation and competition for key FTEs could drive costs higher. At the same time, IT costs are rising, namely within Bankdata, where IT investments are rising. In 2018, the bank's IT costs to Bankdata rose by DKK18m, a development that was seen as unsatisfactory.

A deterioration in credit quality

Sparekassen Sjælland-Fyn has grown lending materially in recent years, and from 2016-18 the bank attracted an accumulated 11% new customers. Higher growth and new customer inflow could potentially trigger excessive risk taking and as a result higher loan loss provisions. However, considering the lending portfolio churn in the past decade to a more residentially dominated lending book, we are not concerned.

New strategy to build on

After a strong end to 2021 and excellent delivery on the 'New Ways' strategy, we are pleased to see management announce a new strategy for 2025-26 called 'Towards New Goals'. The former strategy, New Ways, in our view centred on fixing the business model, where the bank's structural profitability had come down to an unsustainable level. The new strategy is thus a continuation and a further strengthening of the business model.

The new targets are:

- Cost/income ratio below 50% by 2026
- ROE after tax of >10% for the period
- DPS equal to 25% of net profits with share buybacks on top
- A solvency capital ratio of at least 20% (21.9% at Q1 22)
- 4-8% annual growth to total business volumes.

If Sparekassen Sjlælland-Fyn delivers, there should be plenty of value-add for shareholders, too. We estimate a 22-23% solvency capital ratio for 2022-25, hence there could be capital distribution upside relative to our estimates or lowered use of tier-2 capital instruments ahead.

In addition, we estimate a cost/income ratio of 60% for FY2025. Hence, delivering on the target could see costs for 2026E come in 16% below our current estimate or alternatively income come in 19% higher. Keeping all other parameters unchanged, delivering on the 50% cost/income target would lift 2026E net profits by 25-52% versus our current estimates.

The new targets look ambitious to us; however, so did the New Ways targets when they were launched, and despite negative rates and COVID-19 headwinds, management delivered successfully here.

Strong start to 2022 on NII

NII grew slightly in Q1, to DKK146m. Lending fell q/q, mainly from loan repayments, while the strong credit uptick seen at peers was not evident for Sparekassen Sjælland-Fyn, which we attribute to a different corporate client mix. We expect credit demand to pick up from Q2 22 as state guaranteed loans are repaid.

Customer inflow continues, which was particularly evident on off-balance activities. We note that Totalkredit lending rose 6.5% y/y and 1.5% q/q to DK35.5bn. DLR's loans also rose materially to DKK12.8bn, equal to 5.5% y/y growth.

With the above non-balance sheet volumes in mind, total core lending grew 0.9% in Q1 22 to DKK60.2bn or 4.3% higher y/y.

Net interest income and margin development

Source: Company data, Danske Bank Equity Research

Fee income continues to impress

Fee and commission income came in at DKK178m, including dividend income. This is solid compared with previous years and the strong delivery continues.

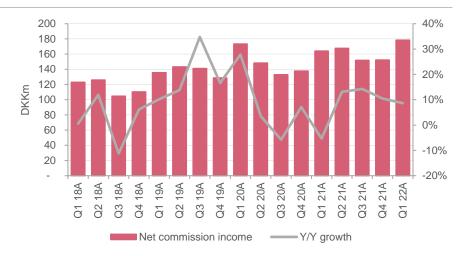

Fee income rose 9% y/y. We are very pleased to see off-balance activities and volume-based fee income drive high-quality fee income lines substantially higher. As a result, guarantee commission income rose 9% y/y while asset management rose 14%.

On activity-based fees, we note payment fees rose 29% y/y but also note that remortgaging and lending fee income fell 19% while trading & custody was flat y/y.

We also note that 'other' fee income continues to grow, as Sparrekasse Sjælland-Fyn is succesful is distributing insurance and pension prodict sales.

The 2022 fee income outlook is promising, in our view.

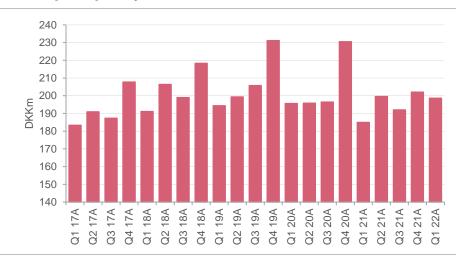

Source: Company data, Danske Bank Equity Research

Costs higher due to one-offs

Total costs came in at DKK199m in Q1 22. Staff costs rose 8% y/y while other administrative costs rose 7%. Sparekassen Sjkælland-Fyn has clearly delivered on the cost plans in the New Ways strategy and we do not consider the Q1 22 cost base a sign that cost focus is less intense from now. While total costs rose 7% y/y, a major part of this was investments in future growth. Adujusted for this, costs rose 3% y/y, which we find prudent in the current environemnt.

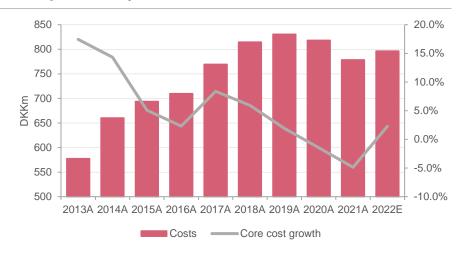

Cost development, quarterly

Source: Company data, Danske Bank Equity Research

Costs could be on the rise in 2022E, given inflation and rising credit demand. However, we would prefer banks to invest in income growth when prudent, and in this case, we see good arguments for investing further. After all, few banks have done as much as Sparekassen Sjælland-Fyn in recent years when it comes to managing income and costs simulaneously.

Source: Company data, Danske Bank Equity Research estimates

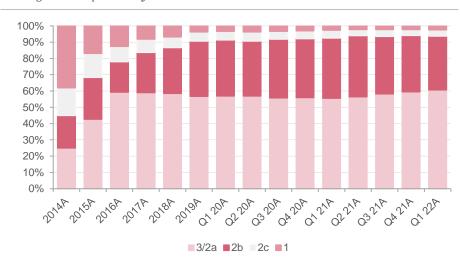

Credit quality very strong and loan loss provisions likely to remain very low

Sparekassen Sjælland-Fyn booked DKK3m of net loan loss reversals in Q1 22. The credit qualiy looks very strong and the management buffer continues to look solid, in our view.

In the bank's home market, house prices are rising (from a lower starting point) as the region benefits from net inflow of new inhabitants and employment is exceptionally good. The agricultural exposure also looks solid, in our view, despite a decline in the pork price in 2021 and 2022.

Measured on the FSA's rating scale, category '3' and '2a' now make up 61% of the total lending book, which is the highest ever recorded.

Lending book composition by Danish FSA criteria

Source: Company data, Danske Bank Equity Research

Capital position solid - new distribution policy

The CET-1 stood at 16.2% at Q1 22, while the solvency capital ratio was 21.9%. The new strategy includes a target of >20% solvency.

Capital distribution should be on the rise in the coming years. We expect Sparekassen Sjælland-Fyn to maintain the annual DPS level of DKK6/share with potential for share buybacks on top. We estimate DKK100m of annual buybacks over the coming years, which brings the total payout ratio to 50-55%.

2022 guidance looks manageable

Sparekassen Sjælland-Fyn expects a pre-tax profit of DKK385m-510m for 2022.

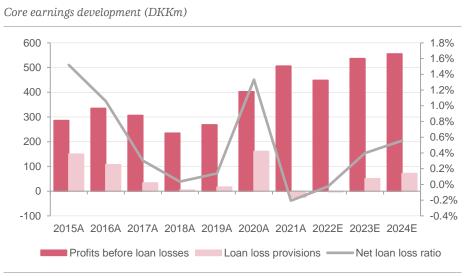

We expect both NII and fee income to improve in 2022, due to solid customer inflow and rising like-for-like credit demand, especially from the corporate segment. In addition, we expect zero loan loss provisions; however, as was the case for Q1 22, we could see negative market adjustments to the parts of the bank's bond portfolios that are not booked as hold to maturity.

We estimate DKK451m of pre-tax profits for 2022.

Rising core earnings remain key

In our view, the Sparekassen Sjælland-Fyn investment case revolves around a low valuation combined with potentially substantial improvements to core earnings and profits in the coming years.

With the new strategy for 2025-26, we expect the bank to continue to demonstrate positive jaws on income versus costs.

Source: Company data, Danske Bank Equity Research estimates

Higher fair value range of DKK183-215

Our capital- and risk-adjusted Gordon Growth model returns a fair value range of DKK183-215/share. This is 9-28% above the current share price. In the range, we apply a cost of capital range of 9.5-10.5% and 60-80bp of normalised loan losses.

Disclosures

This commissioned research report has been prepared by Equity Research, a division of Danske Bank A/S ('Danske Bank'). The author of this research report is Asbjørn Nicholas Mørk.

This commissioned research report should be considered marketing material, as it has been requested and paid for by Sparekassen Sjælland-Fyn and has therefore not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, the report is still subject to prohibition on dealing ahead of the dissemination of the report.

Analyst certification

Each research analyst responsible for the content of this commissioned research report certifies that the views expressed in the research report accurately reflect the research analyst's personal view about the financial instruments and issuers covered by the research report.

Regulation

Authorised and regulated by the Danish Financial Services Authority (Finanstilsynet). Deemed authorised by the Prudential Regulation Authority. Subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details of the Temporary Permissions Regime, which allows EEA-based firms to operate in the UK for a limited period while seeking full authorisation, are available on the Financial Conduct Authority's website.

Danske Bank's commissioned research reports are prepared in accordance with the recommendations of the Danish Securities Dealers Association.

Conflicts of interest

Danske Bank has established procedures to prevent conflicts of interest and to ensure the provision of high-quality research based on research objectivity and independence from outside influences. These procedures are documented in Danske Bank's research policies. Employees within Danske Bank's Research Departments have been instructed that any request that might impair the objectivity of research and independence from outside influence of research shall be referred to Research Management and the Compliance Department. Danske Bank's Research Departments are physically separated from other business areas within Danske Bank and surrounded by arrangements (Chinese Walls) to restrict the flows of sensitive information.

Research analysts are remunerated in part based on the overall profitability of Danske Bank, which includes investment banking revenues, but do not receive bonuses or other remuneration linked to specific corporate finance or debt capital transactions.

Danske Bank, its affiliates, subsidiaries and staff may perform services for or solicit business from Sparekassen Sjælland-Fyn and may hold long or short positions in, or otherwise be interested in, the financial instruments mentioned in this research report. The Equity and Corporate Bonds analysts of Danske Bank and persons in other departments of Danske Bank with which the relevant analysts have close links are not permitted to invest in 1) financial instruments that are covered by the relevant Equity or Corporate Bonds analyst and 2) the research sector within the geographical area (the Nordics) to which the analyst is linked.

Danske Bank, its affiliates and subsidiaries are engaged in commercial banking, securities underwriting, dealing, trading, brokerage, investment management, investment banking, custody and other financial services activities, may be a lender to Sparekassen Sjælland-Fyn and have whatever rights as are available to a creditor under applicable law and the applicable loan and credit agreements. At any time, Danske Bank, its affiliates and subsidiaries may have credit or other information regarding Sparekassen Sjælland-Fyn that is not available to or may not be used by the personnel responsible for the preparation of this report, which might affect the analysis and opinions expressed in this research report.

Danske Bank is a market maker and a liquidity provider and may hold positions in the financial instruments of the issuer(s) mentioned in this research report.

No Parts of this research report have been disclosed to Sparekassen Sjælland-Fyn for factual check.

As an investment bank, Danske Bank, its affiliates and subsidiaries provide a variety of financial services, including investment banking services. It is possible that Danske Bank and/or its affiliates and/or its subsidiaries might seek to become engaged to provide such services to Sparekassen Sjælland-Fyn in the next three months.

Financial models and/or methodology used in this research report

Investment views and opinions in this research report are formed on the basis of a combined selection of discounted cash flow analysis, industry knowledge, peer group analysis and company-specific and market technical elements (events affecting both the financial and operational profile of the company). Forecasting of company sales and earnings is based on segmented bottom-up models using subjective views of relevant future market developments. In addition, the expected macroeconomic environment is taken into account. The output is aggregated into models for group profit and loss, balance sheets and cash flow estimates – all taking into account the recent development in historical research reports.

More information about the valuation and/or methodology and the underlying assumptions is accessible via www.danskebank.com/equityresearch.

Risk warning

Major risks connected with investment views or opinions in this research report, including a sensitivity analysis of relevant assumptions, are stated throughout the text.

Expected updates

This research product will be updated on a semi-annual basis as a minimum.

Completion and first dissemination

The completion date and time in this research report mean the date and time when the author hands over the final version of the research report to Danske Bank's editing function for legal review and editing.

The date and time of first dissemination mean the date and estimated time of the first dissemination of this research report. The estimated time may deviate up to 15 minutes from the effective dissemination time due to technical limitations.

See the back page of this research report for the date and time of first dissemination.

Recommendation structure

This report does not have a target price or a buy/sell recommendation but it does include a valuation discussion and a suggested valuation range.

Validity time period

This communication as well as previous communications referred to below are valid until the earlier of (a) dissemination of a superseding communication by the author, or (b) significant changes in circumstances following its dissemination, including events relating to the market or the issuer, which can influence the price of the issuer or financial instrument.

General disclaimer

This commissioned research report has been prepared by Danske Bank A/S. It is provided for informational purposes only and should not be considered investment, legal or tax advice. It does not constitute or form part of, and shall under no circumstances be considered as, an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instruments (i.e. financial instruments mentioned herein or other financial instruments of any issuer mentioned herein and/or options, warrants, rights or other interests with respect to any such financial instruments) ('Relevant Financial Instruments').

This commissioned research report has been prepared independently and solely on the basis of publicly available information that Danske Bank A/S considers to be reliable but Danske Bank A/S has not independently verified the contents hereof. While reasonable care has been taken to ensure that its contents are not untrue or misleading, no representation or warranty, express or implied, is made as to and no reliance should be placed on the fairness, accuracy, completeness or reasonableness of the information, opinions and projections contained in this commissioned research report and Danske Bank A/S, its affiliates and subsidiaries accept no liability whatsoever for any direct or consequential loss, including without limitation any loss of profits, arising from reliance on this commissioned research report.

The opinions expressed herein are the opinions of the research analysts and reflect their opinion as of the date hereof. These opinions are subject to change and Danske Bank A/S does not undertake to notify any recipient of this research report of any such change nor of any other changes related to the information provided in this commissioned research report.

This commissioned research is not intended for, and may not be redistributed to, retail customers in the United Kingdom and may under no circumstances be distributed in the United States.

This research report is protected by copyright and is intended solely for the designated addressee. It may not be reproduced or distributed, in whole or in part, by any recipient for any purpose without Danske Bank A/S's prior written consent.

Disclaimer related to distribution in the United Kingdom

In the United Kingdom, this document is for distribution only to (I) persons who have professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the 'Order'); (II) high net worth entities falling within article 49(2)(a) to (d) of the Order; or (III) persons who are an elective professional client or a per se professional client under Chapter 3 of the FCA Conduct of Business Sourcebook (all such persons together being referred to as 'Relevant Persons'). In the United Kingdom, this document is directed only at Relevant Persons, and other persons should not act or rely on this document or any of its contents.

Disclaimer related to distribution in the European Economic Area

This document is being distributed to and is directed only at persons in member states of the European Economic Area ("EEA") who are 'Qualified Investors' within the meaning of Article 2(e) of the Prospectus Regulation (Regulation (EU) 2017/1129) ('Qualified Investors'). Any person in the EEA who receives this document will be deemed to have represented and agreed that it is a Qualified Investor. Any such recipient will also be deemed to have represented and agreed that it has not received this document on behalf of persons in the EEA other than Qualified Investors or persons in the UK and member states (where equivalent legislation exists) for whom the investor has authority to make decisions on a wholly discretionary basis. Danske Bank A/S will rely on the truth and accuracy of the foregoing representations and agreements. Any person in the EEA who is not a Qualified Investor should not act or rely on this document or any of its contents.
