Management commentary for the Sparekassen Sjælland-Fyn Group

Sparekassen's net profit has increased quite satisfactorily by 28% to DKK 204.6m.

Core earnings specified to range between DKK 310m and DKK 330m for the financial year 2017 against previous expectations ranging between DKK 290m and DKK 330m.

Expected total maximum losses for the year are reduced once again from the maximum amount of DKK 50m at 30 June 2017 to now DKK 35m.

- Net profit provides a 10.5% return on opening equity.
- Growth in loans and advances can be calculated at 13.1%.
- Growth in business volume can be calculated at 9.8%.
- Impairment losses down to DKK 22.6m, equivalent to an impairment ratio of 0.1%.
- All benchmarks of the Supervisory Diamond are observed with a large margin.
- Strong liquidity position with a liquidity surplus of 218.8%.
- A new branch and a new corporate customer centre opened on 3 November at Islands Brygge in Copenhagen.
- New branches to open in Greve and Helsinge.
- New strategy and share issue under way as stated in a separate stock market announcement.

Business model and branch strategy

The positive development in Sparekassen's business and performance continued in Q3.

Pre-tax profit is DKK 74.0m for Q3 2017 compared to DKK 69.6m for the same period in 2016. Profit for Q1 to Q3 2017 stands at DKK 224.4m against DKK 189.5m in 2016. This 18.4% increase is a result of Sparekassen's business model under which the continuation of existing branches and the establishment of new ones grow its customer base and business volume most satisfactorily.

The profit realised and the continued positive business development are considered highly satisfactory.

Inflow of customers continues

Sparekassen is servicing more and more customers. Earlier in the year, Sparekassen passed 150,000 customers in Zealand and Funen. Every day, Sparekassen is seeing a very satisfactory inflow of customers, and with the branch openings ahead, we look forward to passing the 160,000 customer mark within a foreseeable future.

What is just as important as local presence is that Sparekassen ensures that customers are serviced properly. This is done, for example, by Sparekassen's range of borrowing facilities, savings, pension and insurance schemes and products matching any needs that the customers might have. Sparekassen is fully competitive also within the field of housing finance, and much of the positive development

arises from housing loans, cooperative housing loans and not least the arrangement of mortgage loans. These types of loans are very much in demand by Sparekassen's current and new customers.

To customers, local advisory services and not least personal advisory services are the primary reason why they choose Sparekassen. To make sure that customers receive good advice, Sparekassen regularly ensures that its staff are trained and educated in the financial products and the financial services regulations. This is also one of the key selection criteria when Sparekassen engages new people to service the increasing number of customers.

So Sparekassen feels well prepared to provide competent services to our customers also going forward.

The inflow of customers and the increase in activity have resulted in a business volume standing at DKK 33.7bn at 30 September 2017, an increase of 9.8% on the same date last year. The business volume represents the development in deposits, loans and advances and guarantees which are all on the rise. As mentioned, it is within housing loans and corporate customer loans that Sparekassen continues to experience increased demand.

New branches and a new corporate customer centre

On 3 November 2017, Sparekassen opened a new branch as well as a new corporate customer centre at Islands Brygge in Copenhagen. The expansion of the branch network continues with the setup of new branches in both Greve and Helsinge. The physical locations are in place and most of the local staff has been appointed. It is most satisfactory to see in this context that a lot of really talented people are heading for Sparekassen.

With these setups, the total network reaches 53 branches, four of which are specialised corporate customer centres located in Copenhagen (Islands Brygge), Odense, Næstved and Holbæk.

Digital strategy

The development of Sparekassen's presence on digital platforms will be intensified considerably in the years ahead, and, by using our branches as a launch pad, we will be able to offer customers a wide range of solutions that each customer can use when they have the time and opportunity.

Sparekassen considers developing new digital solutions something that goes hand in hand with the branch strategy adopted. This involves a continuous extension of the digital savings bank that services customers who either do not have time to go to the local branch or are outside Sparekassen's market area. The digital savings bank is staffed with well-educated and well-trained advisors, and in the longer term it will be able to service customers all over the country, both inside and outside ordinary office hours.

Sparekassen also wants to prepare for the future by joining the environments most likely to create new digital solutions in the financial sector. By partnering with Copenhagen FinTech and the university-based Venture Cup, Sparekassen is very close to the technological developments that take place right now and keeps a tab on the start-up environment.

Impairment losses and losses on loans and advances continue to go down

The continued positive economic trends which include prices in the housing market and stable developments in the labour market and inflation etc are key to the development in Sparekassen's impairment losses and losses on loans and advances.

The positive economic trends have had a positive effect on Sparekassen's Zealandic and Funen market areas in particular. This has also had a notable effect on Sparekassen's impairment losses and losses on loans and advances which amount to DKK 2.5m for Q3 and the Y-T-D total is DKK 22.6m, which is the lowest amount since 2007.

Capital resources

Sparekassen's capital resources remain satisfactory compared to its business volume, with an excess capital adequacy ratio of 5.5 percentage points relative to the capital requirement, and an excess cover ratio of 4.3 percentage points relative to the total capital requirement and the combined capital buffer requirement.

To match continued growth in the business volume and to phase in the capital buffer requirement and new eligible liabilities requirements, Sparekassen intends to increase its capital resources as stated in a separate stock market announcement.

Successful dialogue sessions with the shareholders

From the end of August to mid-September, Sparekassen had ten dialogue sessions which started at Vallekilde-Hørve Fritidscenter and continued in Næstved, Ringsted, Kalundborg, Slagelse, Faaborg, Odense, Roskilde, Frederiksværk and Copenhagen. So these dialogue sessions reach out to the entire market area and are an offer to shareholders to come and meet Sparekassen's Executive Board, hear about financial and business developments, have a chance to ask questions and participate in an enjoyable get-together with refreshments and musical entertainment. The dialogue sessions attracted a record high number of around 4,000 shareholders.

It is very encouraging to see the shareholders support Sparekassen locally, which is what the business model is based on. Sparekassen would like to have even more shareholders and would welcome them at the dialogue sessions to come.

Regulatory impacts

The financial sector is very much subject to changes in existing, and implementation of new, regulatory requirements. It takes many resources to implement and currently ensure compliance with all regulations. Currently, Sparekassen is working on new rules on investor protection, market transparency etc under the MiFID Directive, new anti-money laundering rules, future payment and privacy rules as well as future capital adequacy requirement rules etc.

With respect to the impact of the future implementation of IFRS 9, it is not possible for Sparekassen to presently make reliable quantitative estimates of its significance. We refer to the comments thereon in the "Summary of significant accounting policies" section in Sparekassen's 2016 Annual Report.

The Annual Report can be found under "2016" at https://www.spks.dk/om_sparekassen/regnskab.

Earnings expectations for 2017

Sparekassen's Q3 2017 core earnings reached a most satisfactory DKK 83.4m. This means that the core earnings announcement of between DKK 290m and DKK 330m for 2017 has been made more specific so as now to range between DKK 310m and DKK 330m for the financial year 2017.

At 30 June 2017, the positive economic trends and not least their effect on Sparekassen's customers entailed that the original announcement of net impairment losses and losses on loans and advances reaching a maximum of DKK 75m was revised so as to reach no more than DKK 50m.

Yet another positive adjustment of this announcement has been made according to which Sparekassen now expects the maximum losses to be DKK 35m. The continued positive development in housing prices in Sparekassen's market area and the quite stable situation in the labour market are what have caused this adjustment.

Financial review

Q3 2017

The pre-tax profit for Q3 2017 stands at DKK 74.0m and is up by 6.3% on Q3 2016.

This improved profit arises from sustained high core earnings and heavily declining impairment losses. During the period, Sparekassen's staff costs and administrative expenses have gone up due to investments in the branch strategy and pay increases through collective agreements. Furthermore, IT expenses are increasing primarily because of financial regulations and the branch strategy. Market value adjustments are below last year's level whereas amortisation, depreciation and impairment losses on intangible assets and property, plant and equipment are higher.

At the end of Q3 2017, the deposits balance, including pooled deposits, stands at DKK 17,172.5m compared to DKK 15,819.8m at the end of Q3 2016, which is up DKK 1,352.7m, or 8.6%. In the same period, loans and advances grew by DKK 1,317.3m, or 13.1%.

The development in financial performance and business activities is considered very satisfactory.

For specific income statement items and balance sheet items for Q3, please refer to the income statements and balance sheets in this Interim Report.

Income statement

Income

Net interest

Y-T-D net interest income is DKK 403.8m against DKK 412.9m for the same period last year. Developments are still affected by generally low interest rates and partly the competitive situation.

Developments are mainly based on changes in the interest income and interest expenses generated by Sparekassen's balances of loans and advances and deposits, but also the interest yielded from the investment of surplus liquidity in bond portfolios or from deposits with Danmarks Nationalbank affect this line item. It is positive that interest income and net interest income are on the rise again compared to last quarter.

As mentioned, the redemption of subordinated loan capital will reduce interest expenses by DKK 10m a year when the full-year effect materialises in 2018.

Fees and commission income

The positive trend in fees and commission income is broad-based. The pick-up in Sparekassen's business activities is evident in securities trading and custody accounts, payment services, loan file management and in guarantee commissions. The increase in guarantee commissions is attributable particularly to Sparekassen's arrangement of mortgage loans for both retail customers and corporate customers.

Fees from securities trading and custody accounts have also developed quite satisfactorily. Sparekassen's services are offered so as to be consistent with the transparency provisions of the MiFID II Directive. This means, for example, that investors in mandate programmes will see an increasing expense deducted directly in the programme whereas a declining expense will occur in the underlying investments in investment fund certificates.

Market value adjustments

Overall, market value adjustments continue to contribute positively to performance. Market value adjustments for the first three quarters of the year total DKK 37.3m. This is very satisfactory particularly when considering that the objective is low risk on the assets forming part of market value adjustments, and investments are therefore made based on this objective.

The large portfolio of especially mortgage credit bonds contributed DKK 30.5m in market value adjustments during the period. This is somewhat less than for the same period last year when they contributed DKK 50.8m. This result is regarded as satisfactory, considering the low risk Sparekassen has taken in the investment.

For shares, the market value adjustments primarily relate to Sparekassen's portfolio of sector shares, meaning shares in companies providing financial solutions which then are offered in the financial

sector and hence by Sparekassen. Market value adjustments for these companies are positive, however, they may fluctuate due to the amounts of dividend they distribute. Market value adjustments of shares are on a par with those seen last year.

Market value adjustments of investment property stands at a negative DKK 18.0m compared to a negative DKK 15.7m last year.

Expenses

Staff and administration

The development of Sparekassen with the opening of new branches and investments in the overall administrative function also result in increasing payroll costs and administrative expenses, which have gone up by a total of DKK 34.4m on the same quarter last year. The increase also includes pay increases through collective agreements, the related rise in pension costs and a rise in the payroll tax payable by financial institutions. This development is therefore consistent with the plan laid down by Sparekassen.

Other administrative expenses have gone up by DKK 12.8m, which is also attributable to the increase in branches, general price rises and increasing IT expenses, for example, for ensuring compliance with financial regulations and the development of tools that may help enhance the efficiency of and improve customer advisory services.

Amortisation, depreciation and impairment losses on intangible assets and property, plant and equipment

Amortisation, depreciation and impairment losses amount to DKK 41.8m, which is on a par with the same period last year. Depreciation of operating equipment, furniture and leasehold improvements totals DKK 18.4m. Amortisation of intangible assets amounts to DKK 11.1m and depreciation and impairment losses on owner-occupied property stand at DKK 12.6m.

Impairment losses

Having gone down by 90% on Q3 2016, Q3 2017 impairment losses of DKK 2.5m are at a very satisfactory level. Total impairment losses of DKK 22.6m for the year and an impairment ratio of 0.1% illustrate that Sparekassen's loan book is developing quite positively. The continued positive economic trends in the labour market and the housing market in Sparekassen's market area are among the factors naturally contributing to this situation. Sparekassen's credit policy too ensures that all loan commitments are subjected to a thorough assessment both when incurred and on a regular basis. The latter aims at dealing with any undesired development in exposures together with the customers as early as possible.

Many of Sparekassen's loans and advances and arranged loans are secured against dwellings, land, commercial properties and other collateral. In this way, Sparekassen seeks to minimise the risk that cannot be avoided given its key activity as a loan provider.

Core earnings of the Group

| Core earnings | Gro | oup |
|--|------------|------------|
| DKK'000 | Q1-Q3 2017 | Q1-Q3 2016 |
| Net interest income | 403.783 | 412.935 |
| Dividend on shares etc | 26.136 | 18.104 |
| Fees and commission income | 340.825 | 304.774 |
| Fees and commission expenses | 14.175 | 14.747 |
| Other operating income | 15.220 | 16.410 |
| Other operating expenses, ordinary | 13.923 | 9.332 |
| Core income | 757.866 | 728.144 |
| Total staff costs and administrative expenses | 500.540 | 465.858 |
| Core earnings | 257.326 | 262.286 |
| Amortisation, depreciation and impairment losses on intangible assets and proper | 41.825 | 41.781 |
| Other operating income, non-ordinary | | 7.143 |
| Other operating expenses (deposit guarantee scheme etc) | 1.014 | 1.235 |
| Impairment losses on loans and advances | 22.551 | 89.345 |
| Market value adjustments | 37.277 | 55.361 |
| Profit/loss on investments in associates and jointly controlled enterprises | -554 | 1.682 |
| Staff costs and administrative expenses, non-ordinary | 4.248 | 4.571 |
| Profit before tax | 224.411 | 189.540 |
| Income tax | 19.827 | 29.123 |
| Net profit | 204.584 | 160.417 |

Core earnings, which are calculated as earnings before other operating expenses (deposit guarantee scheme etc), amortisation and depreciation, loan impairment charges etc, market value adjustments and profit/loss from investments, total DKK 257.3m compared to DKK 262.3m for the same period in 2016.

Core earnings have gone up from DKK 728.4m to DKK 757.9m. As mentioned in the financial review, the increase in earnings is a result of increased business activities.

The development in core earnings is affected by costs for ensuring compliance with regulatory requirements as well as the investments currently made to expand the branch network and to engage staff, including specialist advisors and administrative specialists for the staff functions. These investments, but also the increasing core earnings, are consistent with the strategy arising out of the business model.

Balance sheet

Below, key balance sheet items are commented on as are line items that have been subject to a significant development.

Assets

Loans and advances

The balance of loans and advances has grown to DKK 11.4bn from DKK 10.1bn for Q3 2016. As mentioned in the management commentary, the heavy demand for Sparekassen's arrangement of loans to finance housing has helped boost loans and advances by DKK 1.3bn during the period.

Although there has also been a growing demand by the many new small and medium-sized businesses that have decided to become customers of Sparekassen during the period. Especially in the areas where Sparekassen has set up in recent years, customers welcome that they can be serviced locally and are able to have their holdings of banknotes and coins processed by Sparekassen.

Bonds

Sparekassen still has a large deposit surplus of DKK 5.0bn. Efforts are made to invest it in a way that it will contribute to Sparekassen's earnings at a low risk. The largest portion of the deposit surplus has been invested in government and mortgage credit bonds. Because of developments in the interest rate levels in recent years, the interest yield has been in decline, but instead Sparekassen has been able to generate quite handsome value adjustments on the portfolios.

Equity and liabilities

Deposits

The deposits balance continues to increase. At 30 September 2017, total deposits on traditional accounts and pooled plan accounts amount to DKK 17.2bn, which is DKK 1.4bn up on the same date last year. Particularly the development in pooled plan accounts is very encouraging. This type of deposits that is related to an investment scheme has grown from DKK 397.5m at 30 September 2016 to currently DKK 802.3m. Sparekassen expects this product to continue to develop nicely.

Subordinated loan capital

In 2017, Sparekassen has repaid a total of DKK 163m in subordinated loan capital. In connection with this repayment, Sparekassen obtained a new subordinated loan of DKK 50m at a much lower interest rate than the subordinated loan capital repaid. Based on this, Sparekassen has managed to reduce its interest expenses considerably and hence to have yet another positive contribution to the bottom line.

Equity

Equity stands at DKK 2,739.8m at the balance sheet date and has so been strengthened by DKK 151.2m compared to Q3 2016. Most of the increase represents the positive development in retained earnings, adjusted for dividend paid and changes in the portfolio of treasury shares.

Please also refer to the comments on capital resources in the section below.

Capital structure and liquidity

Capital structure

Sparekassen's risk exposure totals DKK 16,852.6m. Credit risk and market risk have been determined using the standard method. Operational risk has been determined based on the basic indicator method.

Sparekassen's capital ratio is then 14.6%. The capital requirement has been calculated at 9.1%, leading to an excess capital adequacy ratio of 5.5 percentage points. In Danish kroner, this excess is equivalent to DKK 932.3m.

The combined buffer requirement has been calculated at 1.3 percentage points. This results in Sparekassen's excess capital adequacy ratio net of capital requirement and combined buffer requirement standing at 4.3 percentage points. In Danish kroner, this excess is equivalent to DKK 721.6m.

Sparekassen's capital resources and capital ratios have been calculated exclusive of profit for Q3 2017. Had net profit for the period, reduced by dividend paid in accordance with the dividend policy, been included in capital resources, capital ratios and excesses would have been 0.3 percentage points higher.

Sparekassen develops capital plans on a regular basis. These plans enable the assessment of whether the volume of the current capital resources is sufficient.

Sparekassen believes that the capital resources are sufficient to match the risk associated with its current activities and business volume.

Liquidity

Liquidity coverage ratio (LCR)

In October 2015, the liquidity requirements, termed LCR, became effective. These requirements follow from the Capital Requirements Regulation and are therefore applicable to credit institutions throughout Europe.

The LCR requirement is to ensure that credit institutions have sufficient liquid funds to honour expected cash outflows, calculated using an applicable stress model. In addition to the amount of the required liquidity buffer, the requirements define the required composition of the liquid assets that may be used for the buffer. For example, at least 30% of the liquid assets that may be included in the liquidity buffer must be composed of so-called Level 1A assets.

Level 1A assets mean operating cash, Sparekassen's balance on the current account with Danmarks Nationalbank, the portfolio of certificates of deposit issued by Danmarks Nationalbank and the portfolios of bonds issued or guaranteed by the Danish Government.

As, for reasons of returns, Sparekassen has a very large portion of its liquidity surplus and capital resources invested in mortgage credit bonds compared to Level 1A assets, the 30% rule implies that parts of its portfolio of bonds are not included in the calculation of the LCR liquidity buffer. Conversely, Sparekassen may fairly easily raise the LCR by replacing elements of the portfolio of mort-gage credit bonds with Level 1A assets instead.

Under the fully phased-in rules in 2018, the required LCR will be a ratio of 100%. Sparekassen has since year-end 2012 reported the LCR quarterly and since June 2014 reported it monthly to the Danish FSA. So Sparekassen was well-prepared for the commencement of the rules in October 2015. With some adjustments, this reporting has been effected at the same frequency in 2016.

At 30 September 2017, Sparekassen's LCR is 289% against the currently applicable statutory requirement of 80%.

Because of the fine liquidity surplus and without optimising the composition of liquid assets to optimise the LCR, Sparekassen has been well above the statutory requirements during the period of phasing in the ratio. Sparekassen expects to have a solid surplus on this liquidity requirement also in future.

Liquidity surplus according to the Supervisory Diamond benchmark

Sparekassen has a liquidity surplus calculated under the Supervisory Diamond rules for the benchmark of 218.8% relative to a minimum surplus threshold of 50%. Consequently, Sparekassen continues to have a solid surplus, also for this calculation of liquidity. The aim is always to have a sufficiently high level of liquidity, which is both currently and historically the case.

Sparekassen's business model dictates that deposits must fund loans and advances and that it must therefore not be dependent on external funding by way of market funding and transient high-yielding deposits.

At 30 September 2017, Sparekassen has a deposits surplus of over DKK 5.0bn. Its deposits are primarily made by retail customers and small business operators. There are no large single deposits of significance. There are no deposits of significance from other financial services companies. Deposits are also characterised by a very large portion of them being covered by the Danish Deposit Guarantee Fund.

Based on the above and the continued stress testing of liquidity, the current funding profile is regarded as being relatively stable and subject to low risk.

The Supervisory Diamond

Sparekassen respects all thresholds for the benchmarks of the Danish FSA's risk management tool, "the Supervisory Diamond"; the Supervisory Diamond lays down risk-based benchmarks for five specific areas that financial institutions must comply with. The five benchmarks and the current calculations are:

| Benchmark | Threshold | Group |
|-----------------------------------|---|------------|
| | | 30.09.2017 |
| The total of large commitments | < 125% of capital resources | 11,3% |
| Growth in loans and advances p.a. | < 20% | 13,1% |
| Property exposure | < 25% of loans and advances and guarantees | 13,4% |
| Stable funding | Loans and advances/working capital net of bonds with a term to maturity of less than one year | 0,56 |
| Liquidity surplus | > 50% | 218,8% |

Nor in future does Sparekassen expect to have any difficulties in respecting the thresholds of the Supervisory Diamond.

Subsequent events

No events have occurred subsequent to the balance sheet date which are expected to have a material influence on the Group's or the Parent's financial position.

Statement by Management on the Interim Report

The Board of Directors and the Executive Board have today considered and approved the Interim Report of Sparekassen Sjælland-Fyn A/S for the period 1 January to 30 September 2017.

The Interim Report of the Group has been prepared in accordance with IAS 34, *Interim Financial Reporting*, as adopted by the EU and Danish disclosure requirements for interim reports of listed financial companies. Sparekassen's Interim Report and management commentary have been prepared in accordance with the Danish Financial Business Act. Furthermore, the Interim Report is presented in accordance with Danish disclosure requirements for interim reports of listed financial companies.

In our opinion, the Interim Report gives a true and fair view of the Group's and Sparekassen's financial position at 30 September 2017 and of their financial performance and the consolidated cash flows for the period 1 January to 30 September 2017.

We believe that the management commentary contains a fair review of the affairs and conditions referred to therein, as well as a description of the most material risks and elements of uncertainty that may affect the Group and Sparekassen.

The Interim Report has not been audited or reviewed.

^{4.} Engaged in financial business.

^{5.} Q1-Q3 2017 have been calculated exclusive of the profit for Q3 2017.

2 Summary of significant accounting policies

The Q1-Q3 2017 Interim Report has been prepared in accordance with IAS 34, *Interim Financial Reporting*, as adopted by the EU and additional Danish disclosure requirements for interim reports of listed financial companies. Applying ISA 34 entails that presentation is more limited than in a complete annual report and that the measurement principles of the International Financial Reporting Standards (IFRS) have been used.

The accounting policies applied remain unchanged from those applied to present the 2016 consolidated financial statements which contain a complete description of the accounting policies applied.

As Sparekassen cannot at this point in time make reliable quantitative estimates of the significance of the future implementa tion of IFRS 9, please refer to the comments thereon in the "Summary of significant accounting policies" in Sparekassen's 2016 Annual Report (only in Danish).

When presenting the 2016 financial statements, reclassification was made of the dissolution of revaluation reserves for the s ale of property, which in the interim financial statements had been recycled during 2016 from other comprehensive income to profit or loss, was reclassified. This reclassification has not affected core income, comprehensive income, equity or solvency calculation. Comparative figures for 2016 have been adjusted accordingly.

Sparekassen's 2016 Annual Report and other reports on capital requirement, statutory report on corporate social responsibility etc can be found on this website: <u>www.spks.dk/om_sparekassen/regnskab.</u>

3 Critical accounting estimates, assumptions and key sources of estimation uncertainty

Measuring certain assets and liabilities is subject to management estimates of how future events affect the value of such assets and liabilities. Estimates, which are significant to the presentation of financial statements, are made, for example, when determining write-downs on impaired loans and advances as well as provisions. The estimates used are based on assumptions which are considered reasonable by Management, but which are inherently uncertain.

The most significant estimates made by Management in using the Group's accounting policies and the related key sources of estimation uncertainty are the same used in the preparation of the interim financial statements for 2017 as those used to prepare the consolidated financial statements for 2016.

| Group at 30.09.2016 | 0 | 0 | 298.790 | 298.790 |

Investment properties and owner-occupied properties are measured at fair value/revalued amount calculated using a return-based model which is based on an estimate of prices per square metre and a required rate of return. A required rate of return of 3.2% has been used to value properties located in Copenhagen, and a required rate of return between 5.5% and 9.5% has been used for properties located in the rest of Zealand, Funen and Jutland. An increase in the required rate of return would result in a decline in the property's fair value, whereas an increase in rent per square metre in relation to the assumptions applied would result in an increase in the value of the property.

| Total | 5.147.062 | 4.735.093 | 4.810.339 | |

Other contingent liabilities include performance guarantees and other contingent liabilities, including commitments towards the Danish Deposit Guarantee Fund (guarantee capital).

Sparekassen's participation in the data centre Bankdata implies that, in the event of withdrawal, it is obliged to pay a withdrawal compensation. Like other Danish financial institutions, Sparekassen is subject to the Danish Deposit Guarantee Fund and is so obliged, together with other financial institutions, to cover depositors' balances etc of up to EUR 100k with financial institutions in the process of liquidation or bankruptcy.

The Parent participates in a Danish joint taxation arrangement with its subsidiaries. According to the joint taxation provisions of the Danish Corporation Tax Act, Sparekassen is therefore liable for income taxes etc for the jointly taxed companies, and for obligations, if any, relating to the withholding of tax on interest, royalties and dividend for the jointly taxed companies. Together with Investeringsselskabet Sjælland-Fyn A/S and Leasing Fyn Faaborg A/S, Sparekassen Sjælland-Fyn A/S is jointly registered for VAT and payroll tax.

The Group has entered into a number of leases on premises used for bank operations or other activities. If the leases entered into are terminated, a maximum amount of DKK 70.4m (31 December 2016: DKK 73.2m; 30 September 2016: DKK 74.0m) will have to be paid.

The Group has lease commitments amounting to DKK 1.5m (31 December 2016: DKK 0.2m; 30 September 2016: DKK 0.0m).

Totalkredit loans arranged by the Group from 2007 are subject to an agreed right of set-off against future current commissions which Totalkredit may enforce if any losses are recorded on the loans arranged. Sparekassen does not expect that this right of set-off will have a material effect on its financial position.

Except for ordinary contracts of employment with its staff, Sparekassen does not have any other significant obligating arrangements. Due to its business activities, Sparekassen is or may be party to different lawsuits or disputes. Sparekassen assesses the risk in each case, and any necessary provisions are recorded under provisions.

No other contingent liabilities are estimated to exist that have not been recognised as relevant in the balance sheet.

Financial instruments recognised at fair value

Financial instruments are measured based on quoted prices in active markets (Level 1), on generally accepted valuation models with observable market data (Level 2) or on available data that is observable only to a limited extent (Level 3).

Measurement of financial instruments for which prices are quoted in active markets or which is based on generally accepted valuation models with observable market data is not subject to significant estimates.

For financial instruments the measurement of which is based on available data that only to a limited extent is observable market data, such measurement is subject to estimates. Shares etc in Levels 2 and 3 primarily comprise unlisted shares in sector companies and unlisted investment fund certificates.

For unlisted shares in the form of shares in sector-owned companies where such shares are reallocated, such reallocation is considered to be the primary market of the shares. Fair value is determined as the reallocation price, and the shares are included as Level 2 input (observable prices).

For other unlisted shares in sector-owned companies for which observable input is not directly available, measurement is subject to estimates which include information from the companies' financial statements, experience from trading in shares in the relevant companies and input from a qualified external party. The industry association Lokale Pengeinstitutter (LOPI) recommends quarterly fair values of some of the so-called sector shares, meaning the shares held by the banks to participate actively in the infrastructure and the ranges of products supporting the business foundation of the sector. The prices recommended by LOPI are based on shareholders' agreements and transactions conducted in the sector.

Sparekassen makes an independent assessment of the prices recommended and verifies consistency with transactions conducted and financial statements published. Sparekassen estimates that alternative methods for measuring fair value of these shares will not led to much different fair values.

| | 30.09.2017 | 30.09.2016 |
|---|------------|------------|
| Financial instruments measured at fair value in balance | | |
| Carrying amount at beginning of period | 346.717 | 220.642 |
| Market value adjustment in profit or loss, under market value adjustments | 15.605 | 8.867 |
| Purchased | 155.404 | 124.408 |
| Sold | 104.883 | 1.060 |
| Carrying amount at end of period | 412.843 | 352.857 |

Sparekassen's key investment in shares based on Level 3 is the investment in PRAS A/S amounting to DKK 120.9m (30 September 2016: DKK 106.4m), equivalent to 29% (30 September 2016: 30%) of the total fair value of financial instruments in Level 3. The fair value of the investment in PRAS A/S is based on the company's equity value. A change in the company's equity by DKK 100m would affect the fair value of Sparekassen by DKK 5.0m (30 September 2016: DKK 5.0m).

Sparekassen does not have data to make a sensitivity analysis of the investment fund certificates that are measured at fair value in the balance sheet based on Level 3. The investment fund certificates amount to DKK 289.0m (30 September 2016: DKK 233.2m).

Neither in 2017 nor in 2016 have financial instruments been transferred among the different levels. There are no financial instruments for which it has not been possible to measure fair value reliably. If the classification of a financial instrument has changed compared to the beginning of the financial period, such change is deemed to have taken place at the end of the financial period.

17 Financial assets and liabilities, Sparekassen Sjælland-Fyn A/S Group (continued)

Financial instruments recognised at amortised cost

The predominant portion of the Group's receivables, loans and advances and deposits cannot be transferred without the customers' prior consent, and no active market exists for trading in such financial instruments. Fair value estimates are based on factors where changes have occurred in market conditions subsequent to initial recognition of the instrument that are of relevance to the price which would have been agreed had the terms and conditions been agreed on the balance sheet date. Other parties might reach another amount for such estimates.

The data on fair value of financial instruments recognised at amortised cost is based on the following assessments:

- If a quoted market price exists for a financial instrument, such price is used. This is the case for bonds measured at amortised cost.
- For some of the Group's deposits and loans and advances etc, the interest rate relies on developments in interest rates. Therefore, the fair value is essentially deemed to be consistent with the carrying amount.
- The fair value of loans and advances has been determined based on an informed estimate that is built on the Group regularly
 changing its loan covenants to match current market conditions. For loans and advances, the impairment losses recognised are
 considered to correspond to fair value adjustments of the credit risk. The difference relative to fair values is composed entirely of
 fees and commissions received but not recognised.
- The fair value of deposits, bonds issued and subordinated loan capital is deemed to be equivalent, in all material respects, with the carrying amount.

^{1.} The ratio does not include discount. Please refer to note 9 for a specification of total impairment losses, provisions and discounts.

^{2.} Calculated based on the number of outstanding shares at end of period.

 $^{\rm 3.}$ Calculated based on the average number of shares during the period.

^{4.} Engaged in financial business.

^{5.} Q1-Q3 2017 have been calculated exclusive of the profit for Q3 2017.

2 Summary of significant accounting policies

The Q1-Q3 2017 financial statements of Sparekassen (Parent) have been prepared in accordance with the Danish Executive Order on Financial Reports for Credit Institutions and Investment Companies, etc, as well as additional Danish disclosure requirements for interim reports for listed financial companies.

The accounting policies applied remain unchanged from those applied to present the 2016 parent financial statements which con tain a complete description of the accounting policies applied.

As Sparekassen cannot at this point in time make reliable quantitative estimates of the significance of the future implementa tion of IFRS 9, please refer to the comments thereon in the "Summary of significant accounting policies" in Sparekassen's 2016 Annual Report (only in Danish).

When presenting the 2016 financial statements, reclassification was made of the dissolution of revaluation reserves for the s ale of property, which in the interim financial statements had been recycled during 2016 from other comprehensive income to profit or loss, was reclassified. This reclassification has not affected core income, comprehensive income, equity or solvency calculation. C omparative figures for 2016 have been adjusted accordingly.

Combination of activities

Effective from 1 January 2016, the Group's savings bank activities were combined in Sparekassen Sjælland-Fyn A/S by transferring the activities of the subsidiary Sparekassen Fyn A/S (excluding mortgage deeds) to the activities of the Parent Sparekassen Sjæll and-Fyn A/S. The transfer was carried through using the uniting-of-interests method.

The 2016 comparative figures of Sparekassen Sjælland-Fyn A/S have been adjusted accordingly.

Sparekassen's 2016 Annual Report and other reports on capital requirement, statutory report on corporate social responsibility etc can be found on this website: www.spks.dk/om_sparekassen/regnskab.

3 Critical accounting estimates, assumptions and key sources of estimation uncertainty

Measuring certain assets and liabilities is subject to management estimates of how future events affect the value of such assets and liabilities. Estimates, which are significant to the presentation of financial statements, are made, for example, when determining writedowns on impaired loans and advances as well as provisions. The estimates used are based on assumptions which are considered reasonable by Management, but which are inherently uncertain.

The most significant estimates made by Management in using Sparekassen's accounting policies and the related key sources of estimation uncertainty are the same used in the preparation of the interim financial statements for 2017 as those used to prepare the parent financial statements for 2016.
